

🚀 AI Content Generator (Full Stack AI SaaS Project)

An AI-powered content generation platform built using **Streamlit, FastAPI, and Groq LLaMA 3.3 70B**.

This project generates high-quality, structured, and contextual content for multiple platforms like LinkedIn, Instagram, Blogs, Emails, and more.

📌 Project Overview

The AI Content Generator is a full-stack application that allows users to generate professional content instantly using AI.

It takes user inputs such as:

- Topic
- Technology
- Content Type
- Tone

and returns **well-structured AI-generated content** using Groq's LLaMA 3 model.

🎯 Key Features

🧠 AI-Powered Generation

- Uses **Groq LLaMA 3.3 70B model**

- Produces human-like, structured content
- Context-aware generation

🎨 Multi-Format Content Support

- LinkedIn Posts
- Blog Articles
- Instagram Captions
- Twitter/X Posts
- Email Drafts
- YouTube Descriptions

⚙️ Customization Options

- Select Technology (AI, Python, React, etc.)
- Choose Tone (Professional, Casual, Marketing, Friendly)
- Choose Content Type

⚡ Fast & Lightweight

- FastAPI backend for high performance
- Minimal latency AI responses

💻 Interactive UI

- Built using Streamlit
- Simple and user-friendly interface
- Real-time generation with loading spinner

🏗️ System Architecture
